Skin contact: Remove all contaminated clothes and footwear immediately unless stuck to skin. Wash immediately with plenty of soap and water. Drench the affected skin with running water for 10 minutes or longer if substance is still on skin. Obtain medical attention if ill effect or irritation develops

Eye contact: Bathe the eye with running water for 15 minutes. Remove contact lenses, if present and easy to do. Obtain medical attention if pain, blinking, tears or redness persist.

Ingestion: Wash out mouth with water. Provide fresh air. Do not induce vomiting. If unconscious, check for breathing and apply artificial respiration if necessary. Call a poison center or doctor/physician if you feel unwell. Consult a doctor.

Inhalation: Remove casualty from exposure ensuring one's own safety whilst doing so. If conscious, ensure the casualty sits or lies down. If unconscious and breathing is OK, place in the recovery position. If breathing becomes bubbly, have the casualty sit and provide oxygen if available. Transfer to hospital as soon as possible.

4.2. Most important symptoms and effects, both acute and delayed

Skin contact: There may be mild irritation at the site of contact. May dry skin leading to irritation if contact is prolonged or skin is sensitive.

Eye contact: There may be irritation and redness.
