

Instructions for Water Analysis Kit

- 1 - Upon purchase of the water report analysis you will be posted a pre-paid envelope and vial for placing your water sample into.**
- 2 - Once you have received your test kit from The Malt Miller, add 20ml of your home/brewery tap water to the vial & screw lid on firmly.**
- 3 - Fill out your Laboratory Submission Form**
- 4 - Place the water sample and the Laboratory Submission Form into the prepaid envelope and post as soon as possible.**

Your water will then be tested at Murphy & Sons labs and a report will be emailed to you with your results in approximately 2 weeks. There will be full details of the composition of you water as well as recommended additions for simple adjustments to make.
